Eat green

Reduce the impact
of what we eat...

“Food is the single strongest lever to optimize human health and environmental sustainability on Earth. Adopt a vegan, vegetarian or **flexitarian** diet, which is largely plant based but can occasionally include modest amounts of fish, meat and dairy foods.”

~ from the Summary
Report of the EAT-
Lancet Commission

In 2023 Project Drawdown
rated **reduced food waste**
and **plant-rich diets** at the

top of 20 high-impact climate actions
for households over the next 30 years.

TASK OF THE MONTH

...and **of what is wasted!**

Food waste is responsible for
twice as many greenhouse gas
emissions as commercial
aviation in the US.

~The NY Times, 01/01/23

Ways to reduce food waste:

- ❖ **Plan meals** before shopping to avoid spoilage. Buying only what you are sure to eat will also reduce waste along the supply chain.
- ❖ **Buy local** when possible, which tends to stay fresh longer and saves on shipping.
- ❖ **Compost** your food scraps to keep them out of the landfill.

“**Eat Lower on the Food Chain**”
